#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1618

Claims 1-21 are presented for examination.

The amendments and remarks filed on November 20, 2006 have been received and entered.

Claims 1-21 are rejected under 35 U.S.C. 103 as being unpatentable over Nelson et al. (U.S. Patent 4,490,389) in view of Fritsch et al. (U.S. Patent 5,445,827) for the reasons set forth on pages 2-3 of the office action of July 26, 2006.

Applicant's arguments have been carefully considered, but are not deemed to be persuasive. Applicant in his remarks argues that the prior art cannot be combined, since one relates to a contact lens composition and the other relates to an effervescent ibuprofen composition. The arguments are not well taken. Applicant is reminded that the claims of the instant application are composition claims and a method of administering such composition. The relied upon references clearly teach that ascorbic acid in combination with all the claimed secondary components have been previously used in a pharmaceutical formulation. One reference teaches ascorbic acid in combination with tromethamine and the other reference teaches ascorbic acid in combination with an anti-inflammatory agent and lysine, arginine and N-methylglucosamine in a pharmaceutical formulation. Since, claims of the instant application are not drawn to any specific use, therefore the compositions taught by the prior art read on the composition of the claimed invention. It would have been obvious to use L-ascorbic acid, considering that stereoisomers have the same activity as the racemic mixture with different degrees of effectiveness. Optically active isomer is unpatentable over a prior art racemate or optical isomer of opposite rotation in the

absence of unexpected or unobvious beneficial properties. In re Adamson et al. (CCPA 1960) 275 F2d 952, 125 USPQ 233. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-21 are properly rejected under 35 U.S.C. 103.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zohreh A. Fay whose telephone number is (571) 272-0573. The examiner can normally be reached on Monday to Friday 9:30-6:00.
